Health and Physical Education

First Terminal Examination Answer Key (2026-2027)

Class 8

Total Score: 15

Q. No.	Answer / Explanation	Score
1	**To keep the body healthy**	1
2	**A - 4, B - 1, C - 2, D - 3**	1
3	**Circuit Training:** In circuit training, exercises arranged at various stations are performed continuously. Since each station engages different muscle groups, both muscular strength and muscular endurance are developed. In addition, the systematic repetition and progressive increase in exercises help enhance overall muscular fitness.	2
4	**Symptoms of Malnutrition / Nutritional Deficiency:** ● Frequent fatigue and exhaustion ● General body weakness / lack of strength ● Falling ill frequently and taking a longer time to recover ● Delay in wound healing ● Tendency to withdraw or prefer solitude / mental lethargy ● Inability to tolerate cold temperatures ● Poor concentration affecting learning abilities	2
5	**A - Juvenile Diabetes** **B - Music**	2
6	**Role of Mental Health in Decision Making:** Mental health plays a crucial role in making sound decisions while participating in various activities. A person with good mental health can face stress, failure, and challenges with composure and self-confidence.	2

Q. No.	Answer / Explanation	Score
	Example: In the event of a defeat in a sports competition, not getting depressed, but rather identifying the true causes of the loss and putting in disciplined practice to improve is an example of good mental health.	

Question 7 (Answer any one - Score: 2)

Option	Answer / Explanation	Score
7 A	**Both A and R are true; R is the correct explanation of A.**	2
7 B	**(a) Fitness Component:** Endurance **(b) Explanation:** Individuals with higher endurance can perform continuous physical work for a prolonged duration without fatigue. In events like tug-of-war, sustaining force over a longer period is essential. Therefore, Team A's superior endurance contributed to their victory.	2

Question 8 (Answer any one - Score: 3)

Option	Answer / Explanation	Score
8 A	**(a)** Muscular Strength **(b) Influence on Sports Performance:** Muscular strength significantly impacts athletic performance. Athletes with strong muscles can execute movements with greater force, sprint faster, jump higher, and throw implements further. Moreover, muscular strength helps prevent injuries and delays fatigue during prolonged exertion. **(c) Exercises:** Push-ups, Modified push-ups, Pull-ups, Modified pull-ups, Sit-ups, Plyometric training, Flexed-arm hang, Weight training.	3
8 B	**Role of Training Methods in Improving a Footballer's Performance:** • **Jogging:** Enhances cardiovascular/respiratory fitness and	3

Option	Answer / Explanation	Score
	aerobic endurance. It allows the player to remain active on the pitch for the full duration without getting fatigued. ● **Cycling:** Builds leg strength and muscular endurance. It assists in continuous running, sustaining stamina, and swift movements towards the ball. ● **Interval Training:** Involves periods of high-intensity sprinting alternating with intervals of lighter activity/rest. It develops speed, anaerobic endurance, and the capacity for quick physical recovery during match play. **In summary:** • Jogging → Aerobic Endurance • Cycling → Leg Muscular Strength + Endurance • Interval Training → Speed + Endurance + Rapid Recovery
