A

E-803

SAMAGRA SHIKSHA KERALA
SUMMATIVE ASSESSMENT –TERM III 2025-26
MATHEMATICS

Class:VIII **Time:$1\frac{1}{2}$ Hrs.**

Downloaded From: https://textbooksall.blogspot.com/

Score:40

Instructions:

- Use the first 15 minutes to read the questions and think about answers.
- There are 16 questions, split in to 4 parts A, B, C, D
- Answer all questions; but in questions of the type **A** or **B,** you need answer only one of those.
- You can answer the questions in any order by writing the correct question number.
- Answers must be explained, whenever necessary.

Section A

This section has 4 questions of score 1 each. Select the correct answer.

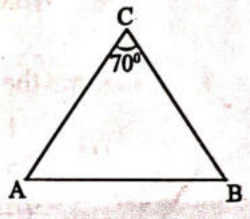

1. One outer angle of a regular polygon is 60^0. Find the number of sides of this regular polygon.

   A. 3 B. 4 C. 5 D. 6

2. In the picture, ABC is a triangle. AC = BC.

   $\angle C = 70^0$, $\angle B$ = ...

   A. 70^0 B. 55^0 C. 110^0 D. 60^0

3. Which of the following statements about parallelogram are correct?

   (i) All parallelogram are rectangles.

   (ii) Rectangle is a parallelogram.

   (iii) Opposite angles of a parallelograms are equal.

   (iv) Diagonals of a parallelograms are perpendicular bisectors.

   Choose the correct answer

   A. i, ii are correct.

   B. ii, iii are correct.

   C. ii, iv are correct.

   D. iii, iv are correct.

4. Read the following statements

   Statement I : In any triangle, the perpendicular bisectors of all three sides intersect at the same point.

   Statement II: The perpendicular bisector of a line is the line that joins points that are equidistant from both ends of that line.

   Choose the correct answer from the following .

   A. Statement **I** is true, Statement **II** is false.

   B. Statement **I** is false, Statement **II** is true.

   C. Both the Statements are true, Statements **II** is the reason of Statement **I.**

   D. Both the Statements are true, Statement **II** is not the reason of Statement **I.**

Section B

This section has 4 questions of score 2 each

5. $x^2 - y^2 = (x+y)(x-y)$. Using this identity find $56^2 - 44^2$.

6. Write the decimal form of the following.

   (i) $\frac{2}{10} + \frac{3}{100} + \frac{4}{1000}$

   (ii) $\frac{3}{20}$

7. A. The length of the rectangle is twice its width. Its perimeter is 42 centimetres . Calculate the length and width of the rectangle.

   OR

   B. A square containing four numbers in a calendar is marked and the sum of these numbers is 80. What are the numbers?

8. Calculate the following.

   (i) $-3\frac{1}{2} + 5\frac{1}{2}$

   (ii) $-6 - 4$

Textbooks All

Section C

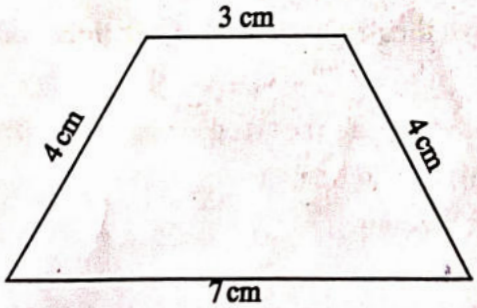

This section has 4 questions of score 3 each

9. A. The angles of a triangle are in the ratio 2 : 3 : 4. What are the angles ?

   OR

   B. A point divides a 14 centimetres long line in the ratio 1 : 4. Calculate the length of each part.

10. Draw a trapezium with given measurements.

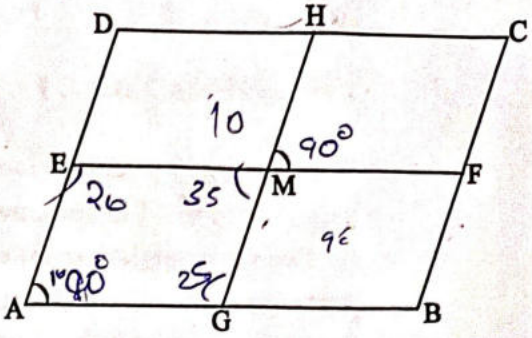

Downloaded From: https://textbooksall.blogspot.com/

11. A. Prove that any quadrilateral with pairs of opposite sides e

OR

B. In the picture ABCD is a parallelogram and the lines joining the midpoints of opposite sides meet at M.

(i) Prove that the lines EF and GH bisects each other.

(ii) Prove that $\angle HMF = \angle EAG$

12. Weight of 25 students in a class are given below (in kilograms).

38	37	40	48	32
39	46	31	42	40
43	33	48	41	34
37	46	41	40	43
34	40	35	36	38

(i) Complete the frequency table.

Class	Tally Mark	Number of children
30-35	IIII	5
35-40	IIII II	7
40-45	IIII IIII	9
45-50	IIII	4

(ii) How many children have weight between 40 and 50 kilograms.

Section D

This section has **4 questions of score 4** each

13. A. (i) Write three fractions with powers of 10 as denominator which gets closer and closer to the fraction $\frac{1}{3}$.

(ii) Write the decimal form of a fraction whose difference from $\frac{1}{3}$ is less than $\frac{1}{1000}$

OR

Downloaded From: https://textbooksall.blogspot.com/

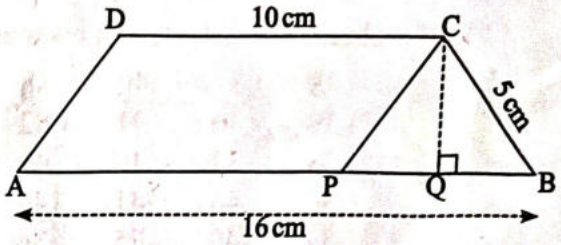

B. (i) Write the decimal form of $\frac{1}{9}$.

(ii) (0.555 . . .) − (0.111 . . . .) = _____

(iii) (0.333 . . .) × (0.6 6 6 . . . .) = _____

14. Two sides of a parallelogram are 8 centimetres and 5 centimetres and distance between the longer sides is 3.5 centimetres.
(i) Draw the parallelogram with given measurements.
(ii) What is the area of this parallelogram?

15. A. In the picture, ABCD is an isosceles trapezium.
PC and AD are parallel lines.
AB = 16 centimetres, CD = 10 centimetres ,
BC = 5 centimetres.

(i) Calculate the length of PB.
(ii) Find the length of CQ.
(iii) Calculate the area of trapezium ABCD.

OR

B. (i) The sum of parallel sides of a trapezium is 16 centimetres and the distance between them is 4 centimetres. What is the area of the trapezium ?
(ii) One of the parallel sides of a trapezium is 2 centimetres more than the other and the distance between them is 4 centimetres. Area of the trapezium is 64 square centimetres. Calculate the length of each parallel side of this trapezium.

16. The table shows the marks of 50 students in a mathematics examination. Draw a histogram of this.

Marks	No of students
10 – 20	7
20 – 30	10
30 – 40	13
40 – 50	9
50 – 60	6
60 – 70	3
70 – 80	2
