Class 8 BS **9** (Biology -3) **Cells and Cell Custers**

Sample Worksheet

1. Based on the following hints, compare a compound microscope with an electron microscope. (Hints:- *Type of lens, Magnification*)

2. Cytoplasm + Nucleus = ---------?

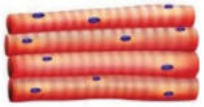

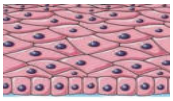

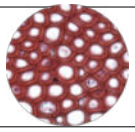

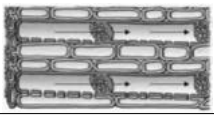

3. Identify and name the following cell organelles. Mention the function of each.

 **A**

 **B**

 **C**

4. Complete the given table showing the functions of tissues:

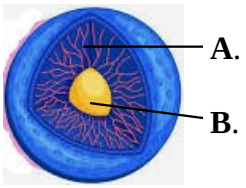

Animal & Plant Tissues		Function
a. Muscular tissue		----------
b. ----------		Covers and protects the surfaces
c. ----------		Provides strength and support to plant parts.
d. Phloem		----------

5. a. Differentiate between a meristematic cell and a mature plant cell:

	Meristematic cell	Mature Plant cell
* Relative size of nucleus		
* Thickness of the cell wall		
* Quantity of protoplasm		

b. Name the simple plant tissues formed from meristematic cells.

6. Redraw the figure and name it. Label the name of A and B on the figure.

7. Name the three types of plastids. Compare them on the basis of pigment colour and function.

8. Unlike dicot stem, monocot stem does not increase its girth (size), instead, increases its length. What will be the raeson?

Rasheed Odakkal
